

# CAIXA ESMOLAS

## Overview:

A different approach to an Alms box which is normally a “boring” box.

This Alms box was developed in a way that the LED candle/light turns on whenever a coin or note is placed creating interactivity with the offeror/praying one, who cannot remain indifferent to the lighting of the candle, as if it were a thanks for the offer.

CAIXA DE ESMOLAS is a product equipped with a microprocessor and optical sensors of high quality ensuring reliability and low consumption and has a delicate glass-based bowl to protect the LED candle.

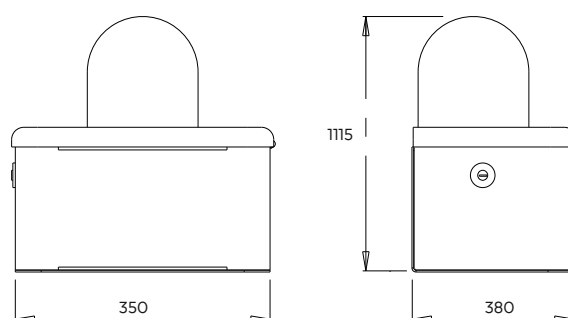

Its battery operation (3x LR14) eliminates any electrical installation need, giving it the possibility to be placed anywhere in the church with a very easy and fast installation process.

## Specifications:

- ♦ Caixa de Esmolas electrónica
- ♦ 1 vela com tecnologia LED
- ♦ Aceita moedas e notas (acende durante 5s)
- ♦ Redoma em vidro
- ♦ Cofre resistente, com chave
- ♦ Construção metálica
- ♦ Alimentação 3x pilha 1.5V (Lr14)
- ♦ Medidas: 213x118x125mm (LxAxP)
