

# EB1 Electronic digital carrillon

## Descrição:

The EB1 is a pre-amplified electronic digital carrillon suitable for reproducing and programming weekly, daily and annually bell sounds. Compact and fully digital, this EB1 features a 300W rms amplifier making this a “plug-n-play” solution for bell sounds as it can be directly connected to speakers or horns. It comes with preset bell sounds from factory:

1. Simple tones, without music/melody. Can be activated each 15', 30', 45' and 60' minutes.
2. Music of “Áve Maria de Fátima”, before the bell sound
3. Music of “Áve Maria de Fátima”, after the bell sound
4. Bell ring for funeral
5. Bell ring for the Mass

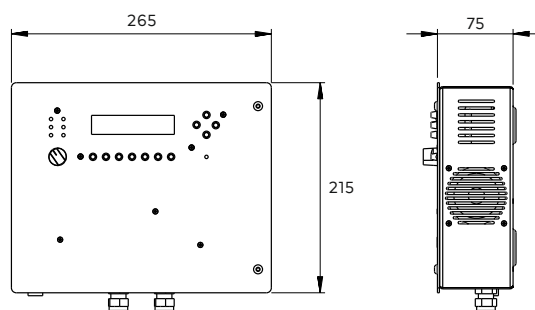

It can be easily used by anyone and the good size retro lighted graphic display is a great help allowing a good clear vision of the available menus and time programming. Moreover it offers straightforward guided instructions in Portuguese. Bell sound programming can be made for daily, weekly or annual programming dates avoiding any mistake made by the user and offers 6 front keys for direct selection. Besides the integrated amplifier the EB1 also features a built-in small loudspeaker working as monitor to allow user to hear the bell sound and/or music before transferring it to the exterior speakers/horns, with an independent level control. No network connection is needed.

## Specifications:

- ♦ Electronic digital carrillon
- ♦ Built-in amplifier - 300W rms
- ♦ Direct connection with the amplifier
- ♦ Retro lighted digital display
- ♦ Guided instructions in Portuguese
- ♦ Bell sound programming can be easily made
- ♦ Straightforward selection of the programs through keys
- ♦ Preset bell sounds from factory
- ♦ Easy to add special melodies
